FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

PETITION FOR LEAVE TO AMEND

National Christian Network, Inc. ("NCN"), applicant for a construction permit for a new noncommercial educational FM station at Fayetteville, Arkansas, by its President, hereby respectfully requests the Presiding Officer to grant it leave to amend its above-referenced application (File No. BPED-900823MA) as set forth herein.

This amendment is usually filed as a matter of routine in non-mutually exclusive applications after the engineering studies are complete and just before they go to cut-off. Normally, Commission staff, by letter or phone-call, notify the applicant of this minor deficiency and a small amendment is requested to complete the process. NCN is on record with the Commission in other applications concerning our policy to eliminate radiation

hazards to workers engaged in maintenance and repair on its towers by terminating its RF transmissions when workers are present.

Good cause exists for this amendment. It is restating NCN's policy and the acceptance of this amendment to our application will determine that no environmental processing under the 47CFR:1.1307 criteria, thereby eliminating the issue of Environmental Assessment (EA), since no RF transmission will be present when work on the tower is being performed.

This amendment will not cause a disruption of the proceedings; no party will be prejudice; no new parties or issues are required; and no comparative advantage will accrue to the amending applicant.

WHEREFORE, good cause having been shown, NCN respectfully requests the Presiding Judge to grant it leave to amend and accept the attached amendment to its pending application.

Respectfully submitted,
NATIONAL CHRISTIAN NETWORK, INC.

By: Raymond A. Kassis

AMENDMENT

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

RF STATEMENT AND POLICY TO ELIMINATE
RADIATION HAZARDS TO TOWER PERSONNEL

It is the policy of National Christian Network, Inc. to post an RF warning sign at the base of the towers it currently operates, as well as its proposed station in Fayetteville, Arkansas. The RF warning sign will be displayed in plain view. The tower access will be limited and controlled by the applicant and the tower owner, by fence or other means. Whenever antenna work is to be performed on the tower, and when workers such as tower crews, work on the tower, National Christian Network, Inc. will turn off its proposed station so that no radiation will be present.

I, Kimberly E. Holman, secretary to National Christian Network, Inc., certify that on the 29th day of May 1992, copies of the foregoing were mailed, postage prepaid, to the following:
